DETAILED ACTION

Allowable Subject Matter

1. Claims 11-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record neither discloses nor teaches a method for manufacturing a reflective and a transfective liquid crystal display device comprising various steps as claimed, more specifically, as the following:

forming a passivation layer on the capacitor upper electrode, and forming a reflective electrode on the passivation layer, and the reflective electrode being electrically connected with the drain electrode at the reflection area, such that there is no contact hole between the capacitor upper electrode and the reflective electrode, so that a depression at the pixel electrode is improved [claims 11, 12, 14 and 18; as shown in Figs. 3A and 3B].

The closest references AAPA, US 5,724,107 (Nishikawa et al) and US 6,362,507 (Ogawa et al) disclose a structure of a liquid crystal display device having a passivation film formed over a storage capacitor, but there is a contact hole in the passivation film using for a reflective electrode contacting the capacitor upper electrode, so that having a depression problem in the pixel region. Ogawa discloses a structure of an electro-optical device using several interlayer insulating films over the storage capacitor, but the

Art Unit: 2871

prior art of record does not disclose that only one passivation film is formed between the reflective electrode and the capacitor upper electrode as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
